

SANJEETH BABU M

Data Engineer-I

+91 63795 88598 | sanjeethbabumani@gmail.com | Dindigul, Tamil Nadu, India

PROFESSIONAL SUMMARY

Data Engineer with 1.8 years of experience in ETL development, data migration, and data platform engineering using PySpark, SQL, Databricks, and Microsoft Azure. Experienced in building scalable data pipelines, implementing data transformation and modelling solutions, and developing AI-powered automation workflows using LLMs and Python. Certified in Azure, Power BI, and Databricks, with hands-on experience delivering enterprise data engineering solutions.

TECHNICAL SKILLS

Data Engineering: PySpark · Python · SQL · J-Script (basic) · Mongoddb

Platforms & Cloud: Databricks · Snowflake · Microsoft Azure (AZ-900) · SSMS / SQL Server · AWS Glue · AWS Athena · Amazon S3 · Power BI (PL-300) · Tableau ·

AI & Automation: LLM Agents · n8n Workflow Automation · LiveKit Voice Agents · Python · Github Actions (CI/CD)

Dev Tools: Git · JIRA · VS Code

WORK EXPERIENCE

Gantec AI · Data Engineer

Jan 2025 – Present

AI solutions company specialising in data engineering and automation services.

- Develop and maintain end-to-end ETL pipelines using PySpark and Databricks, processing and transforming data from multiple source systems into analytics-ready datasets.
- Contribute to ODS decommissioning initiatives, migrating SQL Server tables, views, and stored procedures to Databricks while validating data consistency and business logic.
- Implement data cleansing, transformation, aggregation, and business rules across Bronze, Silver, and Gold layers using PySpark and SQL.
- Develop and optimize SQL and PySpark workloads to improve data processing efficiency and support scalable data engineering workflows.
- Collaborate with stakeholders to develop Power BI dashboards and reporting solutions that provide visibility into business KPIs and operational metrics.
- Develop AI-powered automation workflows using LLMs, Python, and n8n to automate repetitive operational tasks and improve workflow efficiency.

PROFESSIONAL ACHIEVEMENTS

- Successfully migrated SQL Server tables, views, and stored procedures to Databricks as part of an ODS decommission initiative, ensuring data integrity and seamless transition.
- Developed AI-powered automation workflows using LLMs and n8n, reducing manual operational effort and improved the productivity.

Key Data Engineering Concepts

- Data Modelling (Star Schema, Snowflake Schema), Data Warehousing
- Batch Processing & Incremental Data Processing
- Medallion Architecture — Bronze, Silver, Gold
- ETL / ELT Pipelines

DATA ENGINEERING PROJECTS

ODS Decommission Migration *SQL Server · SSMS · Databricks · PySpark*

- Migrated tables, views, and stored procedures from SSMS SQL Server to Databricks, decommissioning the legacy ODS layer with zero data loss and no downtime.

SCD Implementations of raw messages *PySpark · SQL · Databricks*

- Implemented Slowly Changing Dimension Type 1 (overwrite) and Type 2 (full historical tracking) patterns for dimension table management, enabling accurate point-in-time analytics.

ETL Pipeline — Medallion Architecture *PySpark · SQL · Databricks*

- Built end-to-end ETL pipelines following Bronze / Silver / Gold Medallion Architecture for incremental data ingestion, transformation, and analytics-readiness in Databricks.

AI & AUTOMATION PROJECTS

LLM-Powered Productivity Agent (n8n) *n8n · LLM · Telegram · Google Calendar*

- Architected a multi-function AI assistant via n8n integrating Google Calendar and Telegram — automating meeting scheduling, task tracking, and smart reminders through LLM-powered workflows.

Custom LLM AI Agent *Python · LLM · Agents*

- Designed and deployed an AI agent using large language models for intelligent conversational task automation, demonstrating end-to-end agent architecture from prompt design to deployment.

Code Converter Agent *PySpark · VS Code*

- Built an AI agent capable of converting code between languages while operating without direct LLM API access — isolating data in a sandboxed environment for security compliance.

AgentClear — Distributor Web Application *HTML · CSS · JavaScript*

- Developed a client-facing web application for a detergent and household chemical distributor, enabling product catalogue browsing and order management.

CERTIFICATIONS

- **Azure Fundamentals (AZ-900)** - Microsoft
- **Power BI Data Analyst (PL-300)** - Microsoft
- **Certified Associate Developer** - Databricks
- **Data & AI Governance Pre-Sales** - Databricks
- **Cloud Nine Spark Migration Badge** - Databricks
- **Java Full-Stack Developer** - Certified – Qtree Technologies
